Security Tips; brought to you by Fort Knox Safes

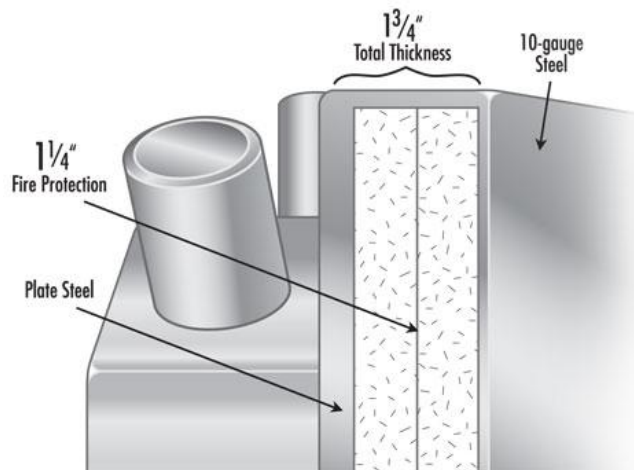

Stop by to see our selection of Ft. Knox safes at the store that are ready to deliver

Store Hours: Mon-Fri 10am – 6pm & Sat 9am – 5pm Closed Sunday

Reinforced Fire Doors:

Our new Reinforced Fire Door adds 2 layers of fire protection to either the 3/8" or 1/4" solid steel plate, then reinforces the door with additional 10-gauge steel for added security (Over 30% thicker steel than other composite type doors). This nearly doubles the standard fire protection from 1450°F in 50 minutes to temperatures of 1680°F in 90 minutes. The Reinforced Fire Door is standard on the Legend, Titan, Executive and Guardian Series as well as the Executive and In-Swing Vault Doors.

"Your valuables deserve the best." Fort Knox's superior fire protection is tested to keep the inside of the safe under 350°F. UL Listed fireboard insulation is used on all 6 sides and behind the hinges to eliminate hot spots or hot pockets. A high temperature, heat sensitive expanding fire seal expands to seal the safe around the entire door on all safes. In addition to the high grade UL listed fireboard and deep bend box, a dead air space is manufactured into the safe which acts as a thermal barrier, much like a thermal pane window, to give added protection. This design provides longer protection at the high temperatures that more resemble an actual house fire.

Fort Knox is proud of the fact that from the raw steel to the last coat of paint, Ft. Knox uses only the best American made products.
